Student Name: _____ Date: _____
Class: Grade 11 / _____ | **Aim High 5** Score: _____ / 20

UNIT 5 — READING — BOTANICAL PHARMACOLOGY & NATURAL REMEDIES

Focus: The Healing Power of Plants & Rainforest Medicine

LEVEL: STANDARD / INDEPENDENT PRACTICE

Part 1: Key Vocabulary & Terminology

Match the correct vocabulary term or definition:

1. An active compound extracted from willow bark that was synthesized into modern aspirin **Term:** _____
2. A natural antimalarial alkaloid originally discovered in the bark of cinchona trees **Term:** _____
3. To extract chemical elements and medicinal properties from biological plants **Term:** _____
4. The science of chemical treatments and pharmaceuticals derived from living nature **Term:** _____
5. Traditional medical customs using herbal remedies across indigenous cultures **Term:** _____

Part 2: Comprehension & Concept Application

Choose the correct option according to the lesson:

1. Where does the chemical precursor of modern aspirin naturally occur in high concentrations?
   A) The inner bark of white willow trees (salicin) **B)** The roots of wild desert cacti **C)** The leaves of arctic pine trees
   D) Marine seaweed on coral reefs
2. Which revolutionary antimalarial medication was derived from the South American cinchona tree?
   A) Quinine **B)** Penicillin **C)** Insulin **D)** Morphine
3. Why do pharmaceutical researchers consider tropical rainforests indispensable to human health?
   A) They harbor thousands of unique plant species with undiscovered therapeutic compounds
   B) They provide cheap lumber for laboratory tables **C)** They have no rain and stay warm all year
   D) They are convenient holiday destinations for scientists
4. Ethnobotanists collaborate closely with indigenous healers primarily to:
   A) Identify which traditional herbal extracts produce tangible physiological healing
   B) Collect rare tropical flowers for decorative gardens **C)** Translate ancient myths into foreign languages
   D) Build modern commercial shopping malls in jungles

Part 3: Practical Sentence Completion

Complete each sentence with a grammatically accurate term from the unit:

1. Chemists successfully synthesized pure _____ (salicin) into modern commercial aspirin.
2. The bark of the cinchona tree produced life-saving _____ (quinine) for malaria patients.
3. Biochemists work to _____ (isolate) active medical molecules from botanical extracts.
